

Save the date for XP2P!

We invite you to the 1st Multiplier Event.

The XP2P project is a collaboration between the Université Savoie Mont Blanc, the Technical University of Cluj-Napoca and the University of Kaiserslautern. Our goal is to integrate new teaching and learning methods in engineering with a focus on mechatronics. We are investigating the influence of peer-to-peer learning in connection with an e-portfolio on the acquisition of competencies by students.

The project results from the conviction that peer learning, i.e. learning with and from each other, is one of the most important forms of learning to strengthen informal learning and promote self-learning competence. The associated e-portfolio serves to orient and document the learning progress of the students and promotes a critical examination of their own learning process. This enables our students in engineering to acquire not only the hard skills necessary for the job, but also interdisciplinary soft skills that qualify them in a special way for the constantly changing job market. You can find further information at <https://xp2p-project.eu/>.

On Thursday, April 29th, 2021, you can participate in the goals and first results of the project via Zoom.

Dear colleagues,

An interactive program awaits you, where you can enter the world of peer-to-peer learning and try out new concepts.

The Multiplier Event offers 9 varied workshops in the subject areas "Peer-to-Peer Learning", "E-Portfolio" and "Assessment/ Competencies". In 3 blocks of 3 simultaneous workshops, you can inform yourself about all aspects of the XP2P project. You will have the opportunity to participate in discussions, actively try out innovative approaches and get to know our project work from the student's perspective.

After the workshops, a keynote speaker (on request) will enhance the event.

We are looking forward to welcoming you at our event.

Kind regards,

the XP2P Team
